

## Guam Early Hearing Detection and Intervention Project (Guam EHDI)

Presentation by Elaine Eclavea, Guam EHDI Coordinator and Joseph John Mendiola, EHDI Data Coordinator Pacific Rim 2011 Pre-EHDI Conference Meeting Saturday, February 19,2011 Atlanta, Georgia

# Part 1: Positive Effects of EHDI

## The Families and Children of Guam Have Benefitted From HRSA and CDC Funding

# **Positive Effects of the EHDI Initiative on Guam**

- Brought attention to the need to identify newborns with hearing loss and to provide early intervention services to alleviate the impact of the disability
- Brought needed funding to support the establishment of early hearing loss detection and the provision of appropriate and timely intervention.
- Brought together members of the health and education communities, as well as the information technology in a mutual goal to improve services to young children

# **Positive Effects of the EHDI Initiative on Guam**

- Demonstrated the power of parents through collaborative partnerships in the Advisory Committee, which has resulted in new directions, improved services, and continued monitoring to improve services for newborns and young children.
- Provided the opportunity in the creation of the Guam EHDI Family Support Group.
- Provided an opportunity to demonstrate how agencies can be electronically linked for a mutual goal in improvement of services to families
- A spin off from support, Guam now has a electronic birth certificate system and is supporting data management for metabolic screening and Children with Special Health Care Needs

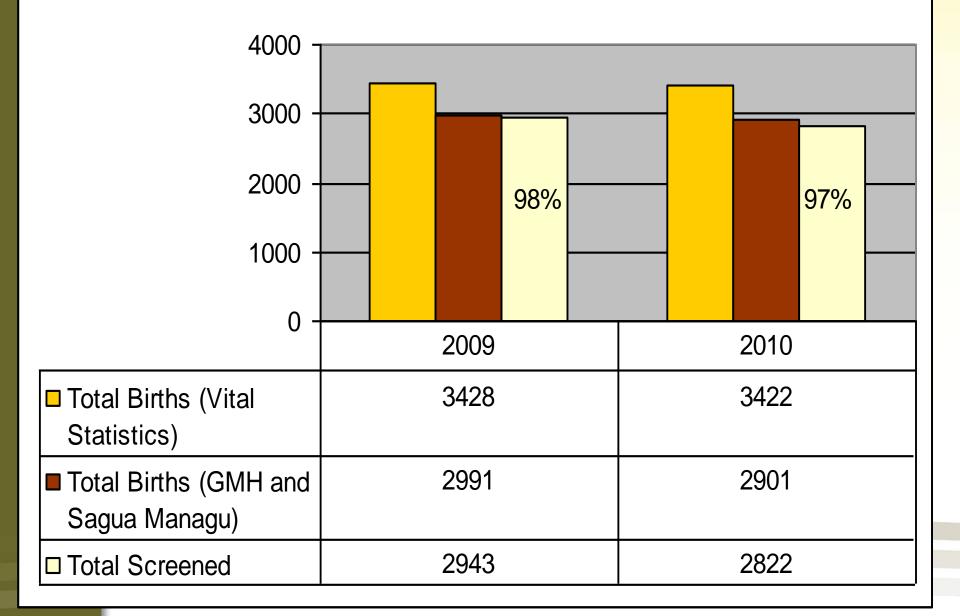

## Part 2: Guam EHDI Data

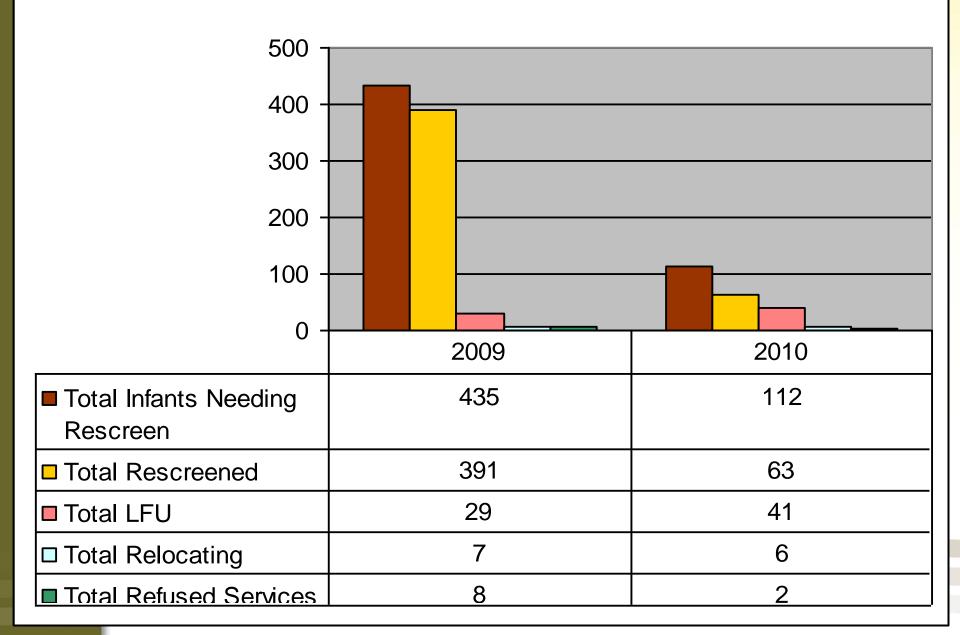

## 2009-2010 Data

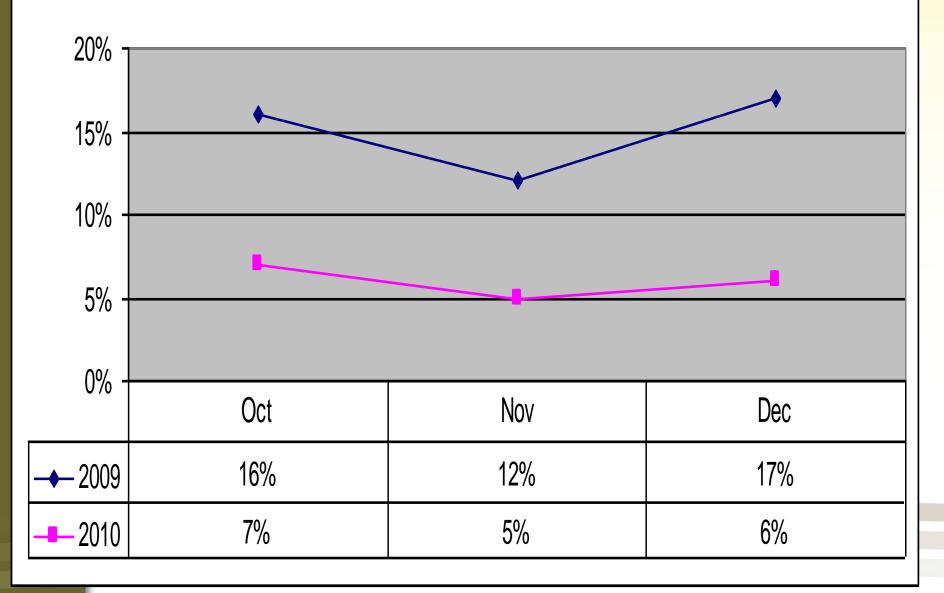

### **Total Infants Screened on Guam**

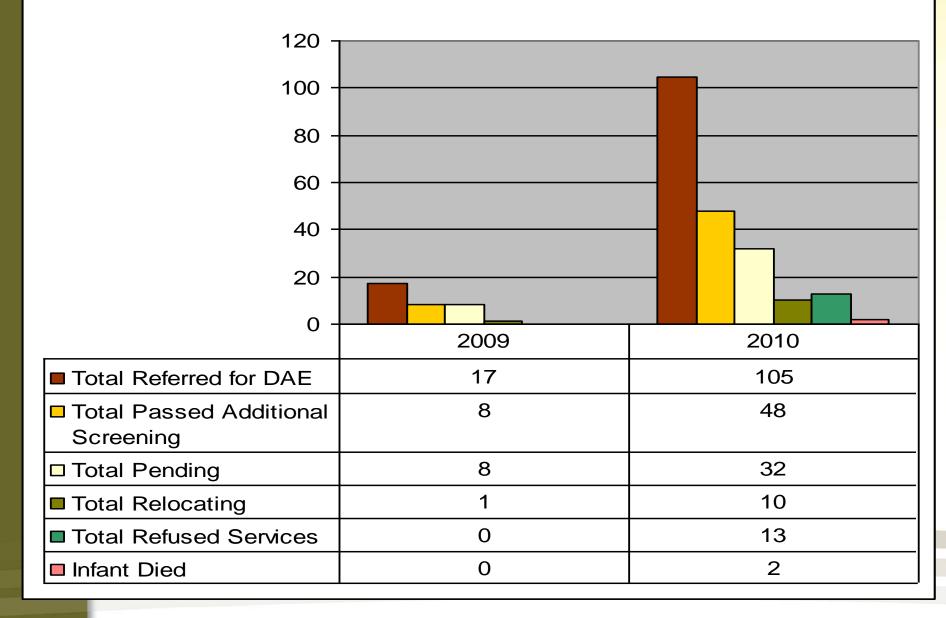

#### **Total Infants Needing a Rescreen**

## FIS Comparison (Oct - Dec)

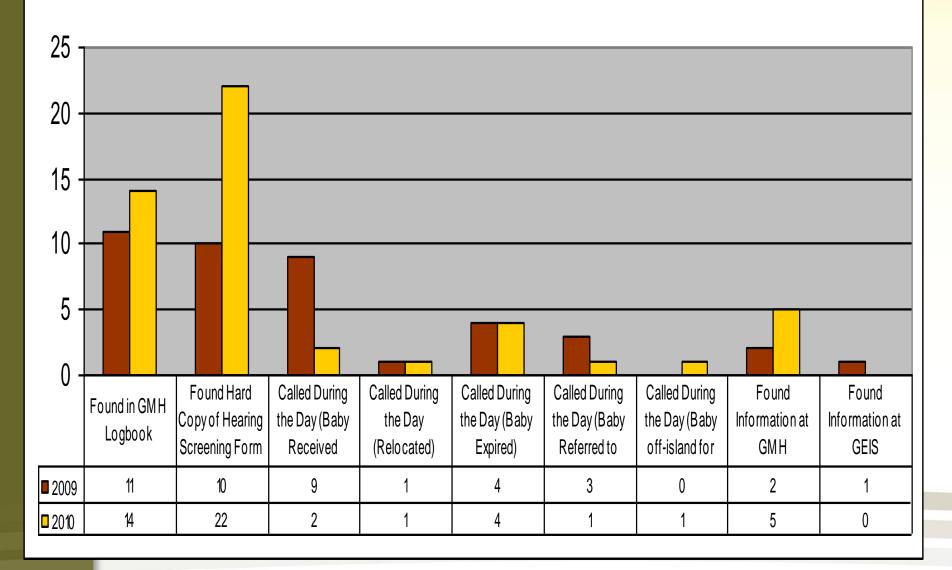

#### **Total Infants Referred for DAE**

## **Early Intervention Services**

 As of 2010, there are 5 infants are receiving early intervention services

### LFU Strategies Used

## **Developed Products**

- www.guamehdi.org
- New Brochures
  - Newborn Hearing Screening Program
  - Hearing and Speech Development

It is important to pay attention to infant speech and language development. If there appears to be any delays, get your infant's hearing tested.

Where is additional testing done? If your baby needs additional testing or you suspect problems with hearing, testing is arranged through the Guam Early Intervention System (GEIS) 300-5776 /5816.

Other Warning Signs of Hearing Loss Your newborn might be at risk for delayed onset hearing loss if any of the following apply:

- You or another caregiver has concerns.
- Family history of childhood hearing loss.
  Neonatal intensive care stay longer than 5 days.
- Chemotherapy.
   Some infections that occur before and after birth (including CMV, bacterial, and viral meningitis).
- Some disorders that affect the baby's nervous system.

If you have a concern about your infant's hearing and speech development, please contact the:

Hearing and Speech Development

# Part 3: What Will Be Accomplished Next Year

### **A Look Ahead**

# **New & Ongoing Directions**

- Continue data management and monitoring for all reporting purposes leading to benchmark levels of performance at all levels.
- Expand further in areas of quality assurance for both services and tracking and surveillance
- Continue monitoring loss to follow up rates, working toward benchmark levels of performance

# **New & Ongoing Directions**

- Continue training and upgrade in hearing screener skills, working with all birth sites, including U.S. Naval Hospital, Guam.
- Expanding the EHDI Family Support Group working with "Hands and Voices".
- Establish tele-audiology plan and implementation to continue providing DAE services

# **Parent Story**
