You are in: Home > Hearing and Hearing Loss > Pediatric Awareness > Discover your child's hearing Send to a friend

Discover your child's hearing

Children's quality of life and development vitally depend on hearing. Children learn to speak because they hear others and themselves communicate. Hearing helps your child learn to read, appreciate music, and receive warnings of approaching harm. Your child will have difficulty coping with many of life's challenges and opportunities at home and in school without good hearing.

Chicago Walk4Hearing

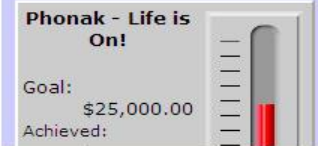

Phonak - Life is On!

Welcome to the Phonak team page!

Both as a company and as a national sponsor of this event, Phonak is very proud to again have its own team for the 2010 Chicago Walk4Hearing. We encourage everyone involved (employees, customers, friends & family members) to help us raise money for this very important cause. Both the Hearing Loss Association of America (HLAA) and Phonak share a similar passion for enriching the lives of the hearing impaired.

Our **fundraising goal of \$25,000** is ambitious, but we know that with the support of everyone involved we will be able to reach and hopefully even surpass it!

Sign-up as a walker now so you can start collecting donations to help make this the most successful Walk4Hearing yet! If you are unable to make the event or are just more comfortable supporting the team, feel free to make a donation on behalf of one of the many walkers. Your support is very much appreciated.
